

CIS 122- Intro Wide Area Networks

Term Paper topics

A one-thousand five hundred word term paper is due on the 15th week of the class (the week prior to the final). The topic of the paper is your choice of any WAN technology.

Possible subjects could include:

ATM
FDDI
CDDI
Giga-MAN
ISDN
Frame Relay
X.25
PPP
V.35
SONET
T-1
PRI
Satellite
DWDM
Dial-up
MPLS

.....or any of the other protocols in the suite. The paper must as a minimum follow APA formatting rules, cover the history of the protocol, its common use(s), the function(s) it provides and its possible future use.

The paper is to be turned in electronically (MS-Word format) to my e-mail box at jkowalski@sc4.edu. Late work will be discounted a minimum of 25%. Work that does not conform to the aforementioned criteria will be deducted a minimum of 10%.

You may use internet references, but you must credit each source. Do not cut and paste 1,500 words from an Internet source and turn it in as your own work!
